Introduction XI

1
The circular economy: an economic model that goes beyond the line

1.1 Linear economy: an economic model that is no longer sustainable 1
1.2 Circular Economy: origins, definitions, and applications 5
1.3 Circular Economy and Corporate Sustainability 17
1.3.1 Economic Sustainability 17
1.3.2 Environmental Sustainability 18
1.3.3 Social Sustainability 18
1.3.4 Integrative Studies 19
1.4 Linking Circular Economy with SWOT Analysis 20
1.5 Circularity is a matter of mindset: the contribution of Systems Thinking in the Circular Economy 25
1.6 Observing circularity through the lens of the Viable Systems Approach 27
1.7 Circular Economy Business Model 28

2
Research methods and data gathering

2.1 Lexical analysis 39
2.1.1 Latent Semantic Analysis 40

pag.

2.1.2 Latent Semantic Analysis and Principal Components Analysis to reduce dimensionality and identify latent structures in the data 44
2.1.3 Latent Semantic Analysis and Agglomerative Hierarchical Clustering for in-depth analysis of textual data 45
2.2 Inferential analyses 47
2.2.1 Necessary Condition Analysis 47
2.3 Data gathering 50

3
Exploring the semantic structure of the responses of companies' representatives: emerging themes and topics

3.1 Question 1. What is the circular economy for you? 54
3.2 Question 2. How is the circular economic model applied in practice in your business? With what results? 60
3.3 Question 3. What, if any, critical issues have you encountered in applying the circular model within your company? 67
3.4 Question 4. Did you already have, or have you developed internally specific expertise in the environment, sustainability, and circular economy? Or was it necessary to seek them outside the company? 74
3.5 Question 5. What are your future plans related to the circular economic model? 81
3.6 Joint evaluation of respondents' answers and the discussion of the quantitative semantic analysis results 87
3.7 Exploring relationships between companies' mission statements, project goals, and the phases of product/service lifecycle in which circularity is applied 92

4
Circularity as a key factor of companies' success: exploring the relationship between circularity and heterogenous performance indicators

4.1 Initial data analyses 104
4.2 Relating circularity and performance: evidence from regression analyses 120
4.3 Circularity as a critical factor for organizational performance: evidence from necessary condition analyses 127

pag.

5
Discussion

5.1 General discussion 139
5.2 Latent semantic analyses and the typology of managerial discourses and narratives on circular economy 140
5.3 Inferential analyses and hypotheses discussion 144

Final chapter

Conclusions 147
Managerial implications 148
Theoretical implications 153
Limitations and possible future research directions 156
